# Media Reviews

## Tech Awards-Editor's Choice

The Covr-2202 was the fastest router by a considerable margin. Its main advantage over its rivals was its excellent range.

HWZ / HWM  
Singapore

## COVR-C1203

Stylish, simple to install, and delivers solid throughput speeds.

PCMag  
US

## DCS-2802KT

The OMNA Wire-Free Indoor/Outdoor Camera Kit provides true wireless security with no catches!

Impulse Gamer  
Australia

## Outstanding Award: DCS-8000LH

Definitely an option to consider if you're looking for an affordable IP camera.

CHIP  
Malaysia

## EXO DIR-3060 & DIR-1960

The Coolest Routers of CES 2019

nuclias

connect

A desktop-based solution offering a robust and customizable network management system. Nuclias connect can easily be integrated into existing networks in conjunction with D-Link wireless APs.

# One Cloud two solutions

Simplicity

Customizable

Cloud Network Management

Complete Solution w/out-of-the-box optimized feature set with dedicated cloud devices

Easy to deploy and manage over the web

Pay-as-you-go  
(Licensing Fee)

Desktop-Based Network Management

Customizable SW Controller w/support for selected D-Link access points\*

App & desktop based Deployment

Cost Effective Scaling

# Nuclias Connect

DNH-100, software controller

## Support both of windows and Linux system

- 30 days trial and free for use after register Nuclias account and do activation
- Windows 10, Windows 2016 and Linux Ubuntu system support\*

## Multi-tenant structure

- Offers multi-layer management authority in one controller for multi-site management

## Remote AP management

- Can manage multiple APs in multiple remote sites

## Report system

- Offers detailed network traffic data for administrator to analysis and improve wireless performance

## Wi-Fi on/off and firmware upgrade by Scheduling

- Admin can configure AP radio on/off and F/W update by scheduling

\*Linux users have to install Docker

# Nuclias Connect Hub

Private Cloud Solution

## Local Management Solution

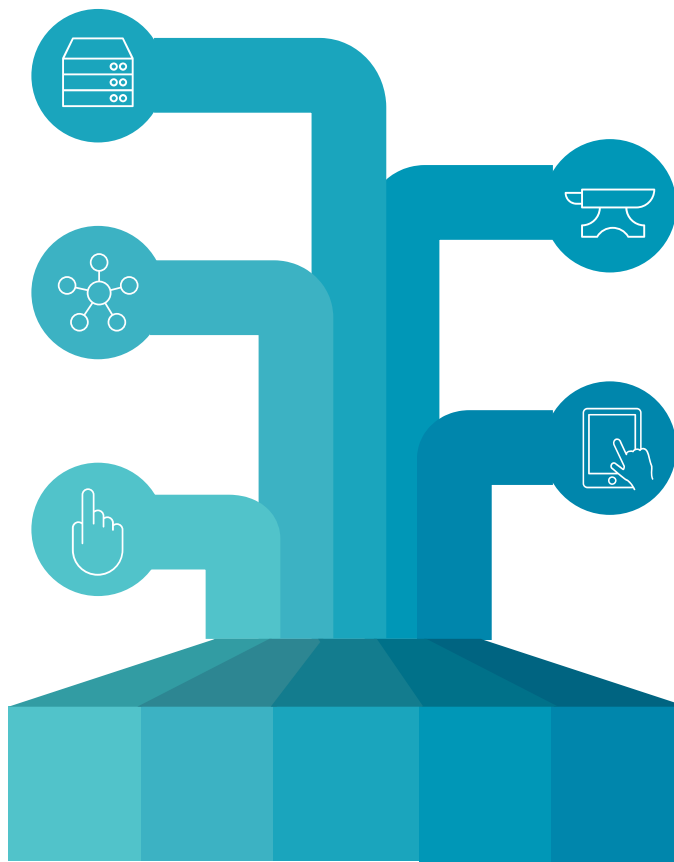

Hardware controller platform, no need extra PC/server for AP management

## Manage up to 100 APs

Can manage all DAP series that support Nuclias Connect platform

## Support Single Sign-On

Single sign on(SSO) portal to manage multiple controllers at one portal

## Built Upon Nuclias Connect

Supports all Nuclias Connect features

## Nuclias Connect App Support

The Nuclias Connect app can monitor your wireless network

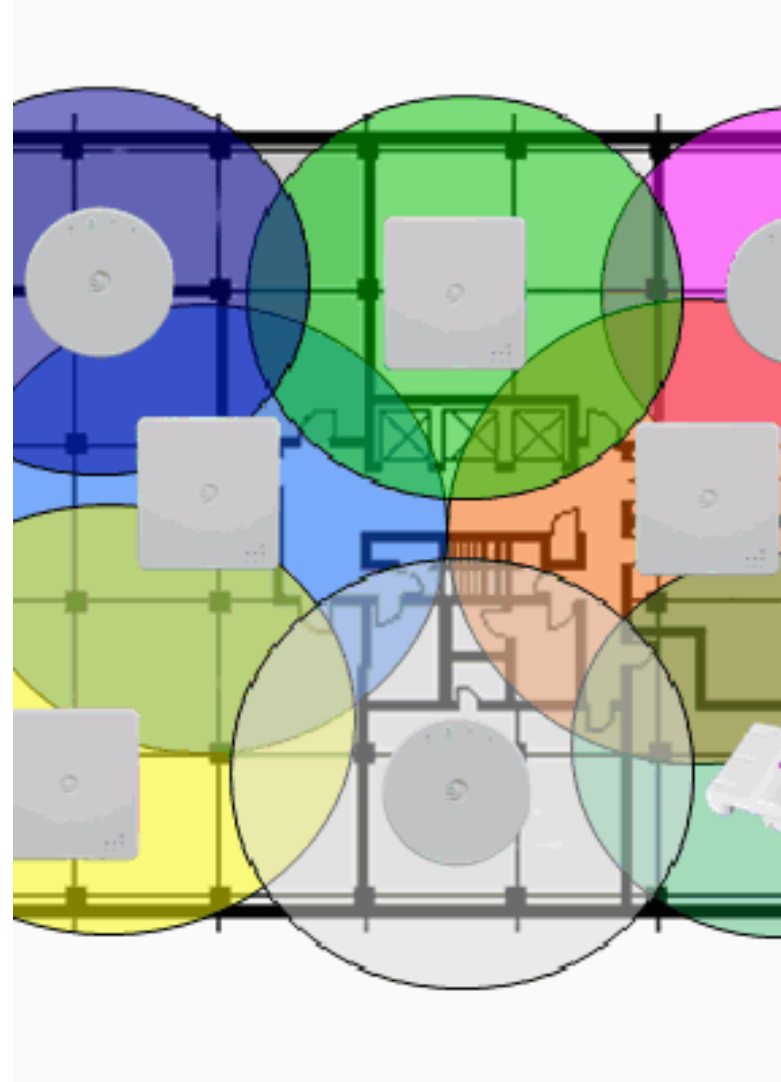

# Auto RF Management

## Auto Power and Channel Adjustment

- Channel and output power can be automatic adjusted to improve performance and enhance security.

## RF self-healing

- Provides automated RF recover functionality to compensate for RF dead zones and AP failures.

# Captive Portal

## Multiple authentication methods support

- Supports local database, external radius, LDAP, POP3, MAC address and passcode authentication

## Access control for wireless user

- White list and restricted network function provided

## Payment gateway and hotspot printing

- Support paypal payment and passcode printing

A family consisting of a father, a mother, and two young children are sitting together on a couch in a living room, smiling and playing video games. The father is holding a game controller. The background is a bright, modern interior with a lamp and a table. The entire image is overlaid with a semi-transparent blue filter.
